

Sign-up for Hail Notifications!

Our Hail Notifications are available to you! This service sends out an email notification if the probability of hail greater than .5" is detected within a buffered area of one mile around each field or section that exist on your policy. The email will contain your policy number, county and crops potentially affected, and will provide a link to your policy within EASYview Weather. The EASYview Weather system will open on the policy and hail event in question for further analysis and exploration. This notification gives you the opportunity to review the notification, check on the potential damage, and contact your agent in the case of a loss.
